

1. Hi

How are you? I am typing this in typst!

1.1. Subsection!

- List item
- Other kind of lists:
 1. This is the other kind of lists!
 2. Again :O

This vim plugin works surprisingly well!

This is a math formula:

$$a + b = \text{rho} \tag{1}$$

$$\lambda = \alpha + \beta$$

$$\lambda' = \beta\rho \tag{2}$$

$$a + b = \rho$$

$$a + b = \text{rho}$$

Check this out — Equation 2.

I can also write math inline like here $\lim_{x \rightarrow 100} x^2 = 10^4$

.

I can do — and –, pretty neat!

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do.

1.1.1. Subsubsection

See Chapter 1.1.1 for more details!
